

SubLOGIC Scenery Disks expand the potential flying environment of SubLOGIC flight simulation products. You must have Flight Simulator II, Microsoft Flight Simulator, or Jet in order to use a Scenery Disk.

Twelve separate Scenery Disks cover the entire continental United States. Additional Scenery Disks covering other areas of the world are also available. Each disk covers a geographical region of a country, and includes the major airports, radio-nav aids, cities, highways, rivers, and lakes located in that region. Enough detail is available on each disk for either visual or instrument cross-country navigation.

STAR Scenery Disks cover smaller areas with a relatively dense amount of scenery. STAR Scenery Disks are primarily intended for visual flight sight-seeing. They include buildings and landmarks, as well as detailed renditions of all major airports in the area.
